

Parts List:(Name and Quantity)

Remote Control Function and Instructions

- Never switch forward and backward operations in the moving, or the gear box and motor will be damaged
- Use the remote control with battery
- Only the baby's legal guardian can use the remote control.
- The product is operated mainly by remote control

Code Method:
Press UP&DOWN Buttons to see that the indicator light is constant on, and turn on the power.

Battery Operating Specifications:

- Never mix new and old batteries, or different kinds of batteries.
- Never mistake positive and negative electrode of battery, or short circuit will happen.
- Never use non-rechargeable batteries.
- Install batteries in a right polarity.
- Only adults can recharge or change batteries.
- Never make power port's short circuit happen.
- Recharge the battery only when it is taken out of the toy car.
- Take exhausted battery out of the toy car and keep it out of Children's reach.
- Remove battery screws with a screwdriver; open battery cap as the arrow signals, and in the 2.4G remote control model install two AAA 1.5V batteries in a right polarity.

Children Electric Car

Children electric car

Installation and Operation Instructions

Stimulation car model

System driven by remote control

Forward, backward and steering operations by remote control

Forward and backward operations by manual shift

Steering wheel's music function

Techniques of volume regulation and MP3's amplification function

Battery power display

Product Specifications:

Name	Parameters
Battery	12V7AH/6V7AH
Generator	12V35W (18000RPM) 12V9W (5000RPM)
Generator Type	12V390/540 (12000RPM) 12V380 (5000RPM)
Applicable Age Range	Babies of 37-95 months
Peak Mass	No more than 25 kilograms
Physical Dimension	118*70*50CM
Speed	3-5 kilometers per hour
Hours of Use	Using 1-2 hours after Charging 8-10 hours
Charging	Input: 220V-240V Output: 12V1000MA / 6V 1000MA
Remote Control Battery	AAA1.5V

Installation Order Diagram

1. Install front wheels

Turn over the car body, distinguish the front and rear wheels, install the front wheel, first put the gasket into the front axle, align the front wheel to the front axle, press the key of the tyre center, and install the front wheel of the other side with the same method.

2. Install the rear wheel

Install the rear wheel, align the rear wheel to the rear axle, press the key in the center of tyre, and install the rear wheel on the other side with the same method.

3. Install the steering wheel

First, the fixed screw on the direction control rod is removed, the connection is connected, the steering wheel is sheathed into the direction control rod, and the screw is fixed.

4. Install the wind deflector

The windshield is inserted into the bayonet on the car body.

5. connection power supply

Connect battery connection, connect the red connection, check the power supply circuit is normal open.

6. Install the seat

Take the screws off the body, then align the seat to the body and screw it

Warnings

Only adults can install parts and adjust the car, and keep moving parts out of children's reach.
Children under 36 months cannot use the toy car as it has many small parts. Children must take the seat belt when using the car, and keep the car out of the fire.
Children can use the product only in the company of adults, and the adult cannot leave during the process.
Never let Children stand or play onto the pedal or in the car.
Only adults can complete storage battery charging, and must charge the product before its first use.
Keep such package materials as plastic bags out of children, or they will suffocate or kill children.
Never use parts provided by non-manufacturers.
Never let children play with the charger.
Never use the product with over 25-kilogram load.
The product's applicable age range is 37-95 months.
The number of connected power by the product can never be over the recommended number.

Notice of use:

Never use the product in such dangerous zones as street, road, slope or drain.
Never change the circuit and additional electric devices.
Never use remote control in rainy days or in the water, never pour water or other liquid into the car, keep the product out of the fire, otherwise the car will be damaged.
Only one child can use the product, and its weight cannot exceed 25 kilograms.
Turn off the power when not in use and remove battery connector when not using it for a long time.
As the product has battery charger, check whether wire plug shell and other parts are damaged or not, and fix those damaged parts.

Charging notice:

Charge storage battery less than 10 hours, or the storage battery will be damaged forever.
In charging, put DC Plug into the power socket, put charger into power plug; never use the product during charging it.
The product can be used for one hour, and the charging time is 8-10 hours, exceeding no more than 18 hours.
It is common for charger and storage battery to have not become heated (temperature under 60 degrees) in charging.
Never use the connector with the water, or short circuit will happen.
Use the product's own charger, or cause charger and storage battery to be damaged or short circuit.
Charge the product when not using it for a long time.

Charging steps are as follows:

- Step 1: Find the charge hole beneath the car seat.
- Step 2: Put the charger plug into the plug hole.
- Step 3: Connect the charger to the power socket.

Relevant materials: PP plastics, k-carrageenan, generator, storage battery and iron castings.

Trouble Clearing

Type	Analysis	Solutions
The car cannot get started	Low battery voltage	Charge battery fully.
	Protection of electric devices	Use the car a few minutes later.
	Failure to press the switch button	Connect/Use the car according to instructions.
	Falling of power connector	Install the connector again.
	Battery breakdown	Change battery.
The battery cannot be charged	Damage of electric devices	Change electric device.
	Generator breakdown	Change generator.
	Falling of battery connector	Install the connector again.
The car has a short range	No charging for the charger	Plug the charger again.
	Charger breakdown	Change the charger.
There appear slight noise and heat of the car in charging.	Not full charging of battery	Charge fully the battery again.
	Multi-used battery	Change the battery.
The car has a slow speed.	Chemical reactions	Normal reactions.
	Multi-used battery	Change the battery.
	No electricity for battery	Charge fully the battery again.
	Overload	Reduce the load below 25 kilograms.
Uneven driving surface	Drive on uneven surface.	

Maintenance and Service

Before use children's parents should check whether charge's wiring, plug, shell and other parts are damaged, and fix those damaged parts.
After using the product for a time, parents should lubricate iron castings with lube, or those castings will get rusted; they should keep the product out of fire and lay it flat in dark places; they should put the product inside the house or cover it with one water-proof cloth in wet weather.
Parents should keep the product out of such hot objects as stove and heater, or its plastic parts may be thawed; they should keep the product out of combustible objects in charging, or the fire may happen.
Parents should clean car surface with one dry cloth, or clean plastic parts with non-waxy furniture polish; they shouldn't clean plastic parts with chemical solutions or clean the car with water; children cannot drive the car in wet or rainy weather, or the car's generator, circuit system and battery will be damaged.
When not using or laying the product, parents should cut off car power, keeping all the switches into "STOP" or "OFF" model.
Parents mustn't use the fuse which doesn't conform with the agreed specifications.
Parents should't change product structure and circuit system, and should have the product checked and fixed by professionals or under the guidance of professionals.
